For three 24-hour reports, submitted and reported on 3/11/12, our committee had to fax in the reports versus using the FEC File Electronic software because of a glitch in the software. We were routinely receiving a "Null" error message, so in order to report in a timely manner per the 24 hour requirement, CPA had to resort to faxing our reports. These reports were also filed again this morning successfully via the FEC file software, so the FEC has received the reports twice. The electronic filing office called on 3/12 to report that they had in fact received the fax with a 3/11 time stamp, and requested that I call my analyst to inform her of the situation. Thus our reports were submitted in a timely manner to reiterate. Thank you.
